UNIQUE TO THE CHESTER GROUP, 'SOUNDS REAL' EXPERIENCE

Experience the unparalleled joy of witnessing the highly talented Damon Sawyer of Crescent Records and artists Ethemia record live in hi-res (384k), immersing yourself in the raw energy and spontaneity that only a live performance can offer. At the event, compare the visceral experience with the meticulously captured, high-resolution playback in a second room simultaneously to get an immediate comparison and hear the fine monitoring supplied by Quested. Also featuring amplification by Ultrafide and cables/mains supplied by quiescent audio showcasing the nuances and details of the artists' mastery. Attendees gain a unique perspective on the difference between live and recorded music, appreciating the artistry in both realms while exploring the intricacies of hi-res audio reproduction.

All this will take place in **Syndicates 1 & 2**.

For further details of timings please see the signs outside the rooms.
